Application programming interfaces (API) Open APIs Open APIs are the interfaces provided by the Autodesk software that an application can use to interact with the software. Typically, they are installed as part of the software package. The available APIs, the documentation and the relevant API and platform versions can be found in the Release Notes for each version of Autodesk software. The list of available Open APIs includes: Web APIs The Webservices API allows interacting with the Autodesk Software and the Services via a standard web interface. The provided access to the functionalities is based on XML-

based method calls. Applications for Android and iOS CadTalk is an API in the AutoCAD family which is able to connect a mobile device to AutoCAD in order to make drawings and other changes directly from the device. As opposed to the iOS app Architect, which works on iPads, this app is for Android. Adobe AutoCAD 360 and Sling AutoCAD app are apps for Android and iOS that provide access to AutoCAD drawings with various options. There is also a website called Autodesk Digital Prototypes (ADP) that allows to design and share models. CAD-Surface-Workbench The CAD-Surface-Workbench is a set of tools for drawing and editing on the screen of a computer. It runs on Windows. MOdel-LISP MOdel-LISP is a programming language which extends AutoCAD's own LISP-based programming language. It allows for programming of objects, workflows and to simplify the process of adding plugins. An MOdel-LISP program can be a plugin or a macro and can be used to add features and to extend AutoCAD's functionality. The MOdel-LISP interpreter (lisp.exe) is built into AutoCAD and can be used in the command line. The interpreter is one of many utilities provided in the main AutoCAD executable file. MOdel-LISP was introduced in release 2009 as a way to add productivity features to AutoCAD and for adding third party tools for collaboration and CAD data management. Network Layer APIs These API are available as they support the communication between AutoCAD and the outside world. These API include the ability to display the AutoCAD drawings and models in other applications, such as Windows Explorer. Other network 5b5f913d15
